Sviluppi e pratiche innovative nella mastoplastica additiva

When we decided to organize a breast aesthetics course for AICPE, we imagined that it would have a different approach compared to similar courses held in the past few years.

The course aims to focus on specific technical aspects of breast augmentation, giving knowledge to the attendees not only about techniques but also tips to improve the practical surgical approach.

The course is aimed at an international audience. ESAPS and SICPRE contribute to the level of the course together with the patronage of ANISC.

The event will take place in Palermo, in the breathtaking location of Mondello beach. Many national and international speakers will be hosted to share their experiences and discuss their experiences to achieve better results in cosmetic breast surgery.

The course is made up into two full days with live surgery and communications of expert surgeons on breast augmentation, giving to the attendees not only knowledge but also tips to improve the practical surgical approach.

Moreover, we want to encourage young surgeons writing on breast surgery with a dedicated award for young surgeons.

* Abbiamo istituito il seguente premio per i giovani chirurghi.

* Abbiamo istituito il seguente award for young surgeons.

Award name: Best Paper in Surgical Techniques Development Prize: 300 CHF (Swiss Francs) and a certificate

These are the pre-requisites to be eligible for this award:

Submit an updated scientific review on the long-term results of breast augmentation and prostheses, of which the first author is a young surgeon aged less than or equal to 35, also a specialist and who has enrolled in the course. Publication fee will be fully waived if your submission is officially accepted after peer-review in the Journal Surgical Techniques Development (waived values 1400 CHF).

Send your abstract to segreteria.aicpe@gmail.com

Submission date should be before 15 October 2023.
