S. Pagano

S. Tas

F. Vercesi

The course will be structured as follows: in the morning, we will have an exciting LIVE Surgery comparison between two facial and neck lifting techniques. In one operating room, an HDS Thread Lifting will be performed - this involves permanent threads inserted under the SMAS along with lipofilling - (Dr. Cravero), while in the other room, a deep plane facelift will be performed (Dr. Gualdi).

In the afternoon, ample time will be dedicated to other tissue-lifting techniques for the face and neck, such as the endoscopic facelift (Dr. Tas), lifting with energy devices (Dr. Pagano), non-surgical lifting with absorbable threads and fillers (Dr. Vercesi), and the mini facelift (Dr. Muti).

The course represents an important opportunity for updates, in-depth learning, and exchange on the most innovative techniques in the field of aesthetic surgery.
